PROFESSIONAL SUMMARY

Computer Science Engineering graduate with internship experience in cloud operations and web development, seeking an Associate Analyst role in Engineering / Cloud Infrastructure. Hands-on exposure to AWS EC2, S3, IAM and CloudWatch, with experience supporting application deployments, monitoring cloud resources, resolving infrastructure issues, and documenting runbooks for operational continuity. Strong analytical, communication, and problem-solving skills with the ability to work in SLA-driven support environments, follow SOPs, maintain accurate incident records, and collaborate across teams.

CORE SKILLS

Cloud & Operations	AWS EC2, S3, IAM, CloudWatch, Infrastructure Monitoring, Incident Tracking, Operational Support, Runbooks
IT / Support Concepts	Basic IT Service Management (ITSM) understanding, SLA awareness, SOP adherence, Escalation support
Technical Skills	Python, SQL (basic), HTML, CSS, Git, GitHub, Flask, NumPy, Pandas, OpenCV
Professional Skills	Analytical problem-solving, verbal and written communication, teamwork, documentation, attention to detail

EXPERIENCE

Cloud Computing Intern | Orionshift, Chennai | Jul 2025 – Aug 2025

- Supported cloud infrastructure operations by monitoring AWS resources, EC2 instances, and S3 usage for application deployments.
- Resolved 10+ infrastructure-related issues and maintained service continuity across deployments by following documented procedures.
- Used CloudWatch dashboards for resource monitoring and alert visibility; assisted in identifying and addressing performance or availability issues.
- Created configuration runbooks and operational documentation that reduced setup time by ~30% and improved handover readiness.
- Applied IAM security policies and collaborated with internal teams during troubleshooting and follow-up activities.

Full Stack Web Development Intern | Skill Intern | 2024

- Worked on project-based web application tasks, strengthening debugging, issue resolution, and documentation skills in a structured team environment.
- Gained exposure to front-end and back-end integration, REST APIs, version control, and collaborative development workflows.

PROJECTS

Speech-to-Text Transcription System | Python, TensorFlow, Flask, Librosa

- Built and deployed a speech-to-text application with Flask, improving transcription accuracy by 18% using model tuning and noise augmentation.
- Processed 500+ audio samples and optimized feature extraction workflows, strengthening analytical and troubleshooting skills relevant to monitoring and operations roles.

Smart Accident Detection and Emergency Response System | Python, TensorFlow, OpenCV

- Developed a real-time monitoring solution that detected accident events from surveillance feeds with 92% accuracy.
- Designed automated alert logic and status notifications, demonstrating incident-detection, escalation, and response-oriented thinking.

PUBLICATION

Smart Accident Detection and Emergency Response System with Accident Severity Classification — International Journal of Advanced Research in Science, Communication and Technology (IJARSCT), Vol. 6, Issue 1, May 2026 | [View Publication](#)

EDUCATION

B.E. Computer Science and Engineering | University College of Engineering, Thirukkuvalai | 2022 – 2026

CGPA: 8.3 / 10.0 | Relevant Coursework: Operating Systems, Computer Networks, DBMS, Cloud Computing, Machine Learning

CERTIFICATIONS & ACHIEVEMENTS

- Cloud Computing Internship Certificate — Orionshift (2025)
- Full Stack Web Development — Skill Intern (2024)
- Web Development Internship Completion Certificate (2024)

- Academic Rank Holder — Computer Science Engineering
