PROFESSIONAL SUMMARY

Computer Science Engineering graduate (CGPA 8.3/10.0) with hands-on expertise in Python, Machine Learning, and AWS Cloud Computing. Demonstrates strong attention to detail, accuracy, and process adherence — qualities directly aligned with first-level loan servicing processing. Experienced in following structured Standard Operating Procedures (SOPs), maintaining SLA targets, and handling data-intensive workflows. Published researcher in an international peer-reviewed journal (IJARSCT). Quick learner eager to contribute technical depth and structured execution to a high-impact BPO team.

TECHNICAL SKILLS

Languages:	Python 3.x (proficient), Java (fundamentals), C
Python Libraries:	TensorFlow 2.x, Flask, Librosa, SciPy, NumPy, Pandas
Cloud (AWS):	EC2, S3, IAM, CloudWatch
Tools:	Git, GitHub
Office / Data:	MS Excel (data processing, reports, lookups, formatting)
Web:	HTML5 (basic)

EXPERIENCE

Cloud Computing Intern — Orionshift, Chennai

Jul 2025 – Aug 2025

- Managed 5+ AWS EC2 instances and S3 buckets supporting 2 production application deployments.
- Reduced environment setup time by ~30% by authoring structured configuration runbooks — directly applicable to SOP-based process documentation.
- Resolved 10+ infrastructure incidents, maintaining 99% service uptime across deployments — demonstrating commitment to quality and TAT adherence.
- Enforced IAM security policies and monitored resource health via CloudWatch dashboards.
- Coordinated with internal stakeholders to seek approvals and escalate issues to supervisors, mirroring loan servicing team communication protocols.

KEY COMPETENCIES (ALIGNED TO LOAN SERVICING ROLE)

Process Adherence & SOP Compliance: Consistently followed structured runbooks and documented procedures in internship; trained to work within QC checklists and workflow systems.

Accuracy & Quality Focus: Achieved 99% uptime and resolved 10+ incidents with zero recurrence; built deep-learning models with 92% accuracy requiring meticulous data validation.

Data Processing & Reporting: Processed and analysed structured datasets (NumPy, Pandas, MS Excel); capable of handling data entry, verification, and information setup tasks.

SLA & Productivity Targets: Delivered internship tasks within defined timelines and volume expectations; familiar with tracking productivity metrics.

Team Collaboration & Communication: Collaborated with supervisors and cross-functional teams; participated in process reviews and team initiatives.

Learning Agility: Academic rank holder; earned Cloud Computing and Full Stack certifications; published research within degree — demonstrates fast, independent learning.

PROJECTS

Speech-to-Text Transcription System

Python · TensorFlow 2.x · Flask · Librosa · SciPy

- Trained a deep learning model achieving 18% accuracy improvement using noise augmentation on 500+ audio samples.
- Extracted MFCC and spectrogram features with Librosa and SciPy, reducing preprocessing time by 40%.
- Deployed as a Flask web application enabling real-time audio upload and transcription.

Smart Accident Detection & Emergency Alert System

Python · TensorFlow · OpenCV · NumPy

- Built a real-time accident detection pipeline using computer vision and deep learning to identify vehicle collisions and human injuries from live surveillance feeds.
- Implemented automated emergency alerting with GPS-based incident location, notifying the nearest hospital and emergency contacts within seconds of detection.
- Achieved 92% detection accuracy by training a CNN on 1,000+ labelled images with data augmentation.

PUBLICATIONS

Smart Accident Detection and Emergency Response System with Accident Severity Classification

EDUCATION

B.E. Computer Science and Engineering

2022 – 2026

University College of Engineering, Thirukkuvalai • CGPA: 8.3 / 10.0

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Machine Learning, Cloud Computing

CERTIFICATIONS & ACHIEVEMENTS

- Cloud Computing Certification — Orionshift (2025)
- Full Stack Web Development Certification — Skill Intern (2024)
- Academic Rank Holder — Computer Science Engineering, University College of Engineering
