SUMMARY

Computer Science Engineering graduate with hands-on experience in cloud infrastructure support, AWS monitoring, incident handling, and operational documentation. Internship experience includes monitoring AWS EC2, S3, IAM, and CloudWatch resources, resolving infrastructure issues, supporting deployment activities, and preparing runbooks to improve operational continuity. Strong analytical, communication, and problem-solving skills with a good understanding of SLA-driven support, SOP adherence, escalation handling, and shift-based operations. Eager to contribute to Associate Analyst / Cloud Infrastructure roles involving monitoring, operations support, incident coordination, and service continuity in a 24x7 environment.

TECHNICAL SKILLS

Languages:	Python, Java (Fundamentals), C
Cloud / Infrastructure:	AWS EC2, S3, IAM, CloudWatch, Cloud Resource Monitoring, Infrastructure Support, Deployment Support
Operations / Support:	Incident Tracking, Alert Monitoring, Operational Support, Runbook Documentation, SOP Adherence, SLA Awareness, Escalation Support, Shift Handover Coordination, Dashboard Monitoring
Tools / Platforms:	Git, GitHub, Monitoring Dashboards, Documentation, Troubleshooting
Web / Development:	HTML5, CSS, Flask, Full Stack Web Development
Libraries / Technologies:	NumPy, Pandas, TensorFlow, OpenCV, Librosa, SciPy

EXPERIENCE

Cloud Computing Intern — Orionshift Jul 2025 – Aug 2025
Chennai

- Supported cloud infrastructure operations by monitoring AWS resources, EC2 instances, and S3 storage usage for application deployments.
- Resolved 10+ infrastructure-related issues and helped maintain service continuity across deployments by following documented procedures and troubleshooting steps.
- Used CloudWatch dashboards for monitoring cloud resources and visibility into alerts, assisting in identifying availability and performance issues.
- Prepared configuration runbooks and operational documentation, reducing setup time by nearly 30% and improving support handover readiness.
- Worked with IAM policies and collaborated with internal teams for issue resolution, follow-up actions, and operational support activities.

Full Stack Web Development Intern — Skill Intern 2024

- Worked on project-based web application tasks, strengthening debugging, issue resolution, documentation, and collaboration skills in a structured development environment.
- Gained exposure to front-end and back-end integration, REST APIs, Git/GitHub workflows, and team-based project coordination.

Web Development Intern 2024

- Built and maintained web pages while improving understanding of troubleshooting, testing, and development support practices.
- Strengthened attention to detail, documentation, and task coordination through hands-on project assign-

ments.

PROJECTS

Speech-to-Text Transcription System

Python, TensorFlow, Flask, Librosa, SciPy

- Built and deployed a speech-to-text application with Flask, improving transcription accuracy by 18% using model tuning and noise augmentation.
- Processed 500+ audio samples and optimized feature extraction workflows, strengthening analytical and troubleshooting skills relevant to monitoring and operations roles.
- Improved preprocessing efficiency and deployment readiness through structured testing and iterative development.

Smart Accident Detection and Emergency Response System

Python, TensorFlow, OpenCV, NumPy

- Developed a real-time monitoring solution that detected accident events from surveillance feeds with 92% accuracy.
- Designed automated alert and notification logic, demonstrating incident-detection, escalation, and response-oriented thinking.
- Worked with image datasets, model testing, and system validation to improve reliability and event detection performance.

PUBLICATIONS

Smart Accident Detection and Emergency Response System with Accident Severity Classification

EDUCATION

B.E. Computer Science and Engineering

2022 – 2026

University College of Engineering, Thirukkuvalai

CGPA: 8.3 / 10.0

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Cloud Computing, Machine Learning

CERTIFICATIONS & ACHIEVEMENTS

- Cloud Computing Internship — Orionshift (2025)
- Full Stack Web Development — Skill Intern (2024)
- Web Development Internship Completion Certificate (2024)
- Academic Rank Holder — Computer Science Engineering
